# EARTH SYSTEMS SEMINARS

## AKUO'S SANTAS SOLAR FARM AND ITS CONTRIBUTION TO THE ENERGY TRANSITION IN PORTUGAL

WHAT'S THIS ABOUT?

The energy transition plays a central role in decarbonization, and Akuo is actively contributing to this process. This presentation highlights the Santos Solar Farm as a key example within Portugal's energy transition, demonstrating how large-scale solar projects support decarbonisation, enhance energy security, and promote sustainability. The project is presented as an example of industry best practices, reflecting high standards in project development, implementation, and integration within the national energy system. Within the context of Portugal's renewable energy strategy, the presentation underscores the importance of solar power in building a resilient and low-carbon energy system.

**Pedro Morais de Castro**  
(Akuo Portugal)

**January 07**  
**Wednesday: 13h00**

in IDL room 1.1.37 (C1) or online  
Teams Meeting ID: 347 677 275 084 0  
Passcode: HS6Yg2Cz
