

Vanessa Fonseca

Vanessa F. Fonseca attained her PhD in Marine Biology in 2010, at the Faculty of Sciences of the University of Lisbon. She is a Researcher at MARE since 2011. Her core research areas are marine and estuarine ecology, physiology and ecotoxicology applied to environmental quality and sustainability of marine resources, and currently focusing on seafood traceability, provenance and safety. She has participated in over 20 scientific projects since 2006: 5 national projects as Principal Investigator or Co-PI, 13 national projects as a team member, 3 national projects as a collaborator and 2 international projects, including an EU project (WISER). VF has published 66 peer-reviewed contributions since 2006 (64 papers and 2 book chapters). Her h-index is 23 with over 1500 citations according to Scopus. She has over 50 communications in international scientific conferences. In 2019 VF co-founded the BIOTOXlab infrastructure at FCUL, for RD and services in biomonitoring, ecotoxicology and sustainability of marine resources, which supports the activities of 16 postgraduate researchers and students. VF has supervised 16 national and international students and fellows at FCUL, where she has taught various courses. As a recognized scientific reviewer, VF is an Associate Editor of marine pollution in Frontiers in Marine Science and F. Envir. Sci. (4 contributions, 2018), and is a frequent reviewer (68 papers, 42 last 5years, Publons) for other SCI journals (24). She was also an external referee in 2 international and 3 national project calls (ANPCT-Argentina, RCN-Norway, PROPOLAR-PT). Over the years she has participated in various science communication activities (eg European Researchers' Night, MARE goes to school program), including media presence in various outlets, in order to present research results to the general public. In 2011 VF received the Young Scientist of the Year Award by Fluvíário de Mora (PT).
