

Are you a
**research
leader**
of tomorrow?

**Interested in a Fellowship
at Newcastle University?**

Our research spans fundamental life sciences, through to clinical and allied healthcare sciences.

We will:

- provide salary support
- provide start up and running costs to get you going with your independent research
- embed you within a high quality research environment
- provide you with career support and mentorship
- help you win your independent fellowship

Newcastle University is seeking highly talented and motivated postdoctoral scientists who plan to apply to national fellowship schemes in the areas of: Cellular and Genetic Medicine, Neuroscience, Cancer, Ageing and Chronic Disease, Cellular and Molecular Biology, Health and Society, and Dentistry and Oral Health.

You will be provided with up to four years (up to two years for internal candidates) underpinning support to enable external fellowship applications to be made.

You will have a strong publication record and be highly competitive for external fellowship funding based in the **Faculty of Medical Sciences** (www.ncl.ac.uk/biomedicine).

You will be mentored by experts and work with our leading researchers to develop independently led projects taking full advantage of the scientific and translational culture in the Faculty.

This opportunity is available through our ongoing **Faculty Fellowship Programme** (www.ncl.ac.uk/biomedicine/research/fellowship/) which aims to support and develop future research leaders. By the end of your Faculty Fellowship a successful programme participant will have secured external fellowship funding and be supported through to the next stage of their career. **Newcastle University** has established an excellent reputation for combining basic, clinical and social sciences to deliver benefit for patients and the public. The Programme is supported by the Wellcome Trust's Institutional Strategic Support Fund.
