

## CALL FOR AWARDING RESEARCH FELLOWSHIPS WITHIN PROJECT GRANTS AND R&D INSTITUTIONS

### 1 Fellowship in Special Regime (BI-RE) for Master Degree

A Fellowship in Special Regime (BI-RE) for a Master Degree is open at the **FCiências.ID – Associação para a Investigação e Desenvolvimento de Ciências**, within Project *PROSEU - PROsumers for the Energy Union: mainstreaming active participation of citizens in the energy transition*, Grant Agreement 764056, financed by the European Commission under the Horizon 2020 Program, under the following conditions:

- 1. Scientific Area:** holding a Master degree in Geographical Engineering or an Energy related degree with a focus on Decentralised Energy Systems, Energy Democracy and/or Energy Communities.
- 2. Requirements for admission:** holding a Master degree in Geographical Engineering or an Energy related degree with a focus on Decentralised Energy Systems, Energy Democracy and/or Energy Communities. Knowledge and experience with both quantitative and qualitative methods for data collection and analysis. Must have excellent domain of English, Portuguese languages and good knowledge of Spanish. Good communication and writing skills.
- 3. Factors preferred:** (these are preferred factors, apply anyway if some requisites are missing) Previous experience working with European projects; previous research experience related to energy and society studies; knowledge of smart grids management and blockchain technologies; experience (as a facilitator and/or participant) with participatory approaches (e.g. action-research, design thinking, co-creation, living labs).
- 4. Work plan:**  
PROSEU project aims to enable the mainstreaming of the prosumer phenomenon into the European Energy Union. Prosumers are active energy users who both consume and produce energy from renewable sources (RES). PROSEU's interdisciplinary and transdisciplinary team will closely work together with RES Prosumer Initiatives (Living Labs), policymakers and other stakeholders from nine countries, following a quasi-experimental approach to learn how prosumer communities, start-ups and businesses are dealing with their own challenges, and to determine what incentive structures will enable the mainstreaming of RES Prosumerism, while safeguarding citizen participation, inclusiveness and transparency. PROSEU will build an integrated knowledge framework for a socio-political, socioeconomic, business and financial, technological, socio-technical and sociocultural understanding of RES prosumerism and coalesce in a comprehensive identification and assessment of incentive structures to enable the process of mainstreaming RES prosumers in the context of the energy transition.

The Project's international Consortium of 11 partners is coordinated by FCIências.ID. The researcher will integrate the FCIências.ID team leading this project and contribute to implement the following research tasks:

Apply questionnaires (in Portuguese, Spanish and English) to survey RES prosumer initiatives across Europe; working directly with 'Living Labs' in Portugal and possibly in Spain; develop a structure for implementing a comparative case study analysis and extract key lessons learned and recommendations for prosumers and collaborate in several Work Packages during the project. Lastly, contribute to/fully author research papers and deliverables presenting the project's results.

- 5. Legislation framework:** Statute of the Scientific Research Fellowship, in accordance with Law 40/2004, of 18 August, as amended and republished by Decree-Law No. 202/2012 of 27 August, and as amended by Decree-Law No. 233/2012 of 29 October and by Law No. 12/2013, of January 29, and Decree-Law No. 89/2013 of 9 July; And also by the FCT, I.P.
