IV. Work Plan

Soil science is essential in different agricultural and environmental domains including precision agriculture, which is a way of ensuring sustainable soil management practices. The EU-funded SOILdarity project will develop a scientific solution that integrates soil ecology with cutting-edge soil and crop sensors, modelling and system control technologies for sustainable soil management. The project will focus on Portugal, where soil health faces considerable challenges due to management and climate changes, erosion and overexploitation patterns.

The work plan tasks are as follows:

- 1) Collaboration in the technical coordination and in conducting the Project's activities, by implementing the scientific and management activities, including the organization of project meetings, interaction with the project Partners and the preparation of reports (WP1);
- 2) Collaboration in the design, organization and content of the SOILdarity training programmes on water management, plant soil interactions, alternative fertilizers (WP2);
- 3) Collaboration and participation in the tasks of WP3: Upgrading skills in research management, administration and sustainable business modelling (WP3);
- 4) Collaboration and participation in the SOILdarity Summer School on resource optimization and precision agriculture (WP4);
- 5) Collaboration and participation in the SOILdarity short-term mobility programs and reception and integration of the incoming students in the local team and host institution, within the scope of Short-term mobility staff exchanges & ESRs involvement which aims to promote student's mobility (WP5);
- 6) Collaboration in the SOILdarity WP6: orientation / elaboration / selection of the Project's informative content for dissemination; collaboration in conferences and seminars in different countries and collaboration in the final Conference of the Project (WP6).

The work plan is included in WPs 1, 2, 3, 4, 5 and 6 of project SOILdarity.
