

# HANDS-ON WORKSHOP EPITHELIAL SYSTEMS: PHYSIOLOGY AND PATHOPHYSIOLOGY

An initiative of the ECFS Basic Science Working Group

FCUL, Lisboa (Portugal) 24 – 28 July 2017

Includes lectures, tutorials and hands-on practicals.

Open to 16 participants

- ✓ Learn about the latest developments in the field
- ✓ Acquire practical skills on:
  - production, cultivation and characterization of epithelial cells
  - collection of nasal cells
  - cultivation of intestinal organoids
  - functional approaches to assess CFTR
- ✓ Discuss your project with the experts

## Topics

- Cell Culture of Epithelial Cells, Tissues and Organoids
- Polarized Cells: Characteristics & Pathways
- Cystic Fibrosis: a Disease of Multiple Epithelial Tissues
- Physiology of Airway Surface Liquid
- Organoids as Model Systems to Epithelia
- Physiology of the Airway Epithelial Cells
- Physiology of the Intestinal Epithelial Cells
- Physiology of the Pancreas and Sweat Gland Electrophysiology techniques

## Lab work and tutorials

- Culture of Primary Human Nasal Cells
- Airway Surface Liquid Microscopy Measurements
- Culture of Intestinal Organoids
- Immunofluorescence of Epithelial Cells & Tissues
- Differentiation & Regeneration Assays
- Organoids Swelling Assay
- Ussing Chamber Analysis of Native Tissues and Polarized Epithelial Cells

**Faculty:** Margarida Amaral (FCUL, Lisboa, Portugal); Jeff Beekman (University of Utrecht, The Netherlands); Michael Gray (University of Newcastle, UK); Martin Hug (University of Freiburg, Germany); Karl Kunzelmann (University of Regensburg, Germany); Rob Tarran (University of North Carolina; NC, USA)

To apply send a CV, letter of motivation and recommendation letter to [Simão Luz \(sfluz@fc.ul.pt\)](mailto:sfluz@fc.ul.pt) until **26 May 2017**.
