

BioISI Research Seminar

From enzyme rigidity to Systems Biology

João Daniel Arrabaça, PhD
DBV / PFG - FCUL

During the last few decades, research in Biology steadily evolved from the description and quantification of individual phenomena to the determination of rates, and their integration into more and more complex, ordered mechanisms. The increasing sophistication of experimental approaches and the rise of informatics tools, allowed us an understanding of the living beings function and complexity that was mostly unthinkable in the 60'.

Host: Rui Malhó
BioISI PFG

When: 2 March 2016, 12h00

Where: Building C8, room 8,2,47

Faculdade de Ciências da Universidade de
Lisboa -Campo Grande, Lisboa (Portugal)
