## **SEMINÁRIO DE ANÁLISE E EQUAÇÕES DIFERENCIAIS**

**Dia 8 de Fevereiro (quinta-feira), às 13H30, na sala 6.2.33**

# **The Cauchy-Dirichlet problem for impulsive ultra-parabolic equations**

**Ivan Kuznetsov**

**(Lavrentyev Institute of Hydrodynamics – Siberian Division of the Russian Academy  
of Sciences, Novosibirsk State University)**

### **Abstract**

Extending the results obtained in [1] we have proved the existence and the uniqueness of entropy solutions to ultra-parabolic equations with initial, boundary and, correspondingly, impulsive conditions. The case without impulsive conditions has been treated in [2,3]. The main challenge of the Cauchy-Dirichlet problem being under our study is that boundary conditions are formulated as inequalities.

(Joint work with Sergey Sazhenkov)
