Bottom-up perspectives on Prosumers and energy system futures

Inês Campos

CCIAM – cE3c

The presentation will offer an outlook of European research project PROSEU (<http://proseu.eu/>), with a focus on the results of a participatory integrated assessment (PIA) for identifying different roadmaps towards a future where renewable energy prosumers are mainstreamed in new energy systems; and with an overview and evaluation of 15 living labs implemented.

Thursday, July 1, 2021

12h00-13h00
