

## Tuesday

9:15 - 10:00	Victoria Gould	Partial semigroups: categories and constellations
10:00 - 10:20	Itamar Stein	Algebras of Ehresmann semigroups and categories
10:20 - 10:40	Karsten Henckell	Decidability of complexity via pointlike sets: A premodern, elementary and constructive approach
10:40 - 11:10	Break	
11:10 - 11:30	Manuela Sobral	Homological lemmas for Schreier extensions of monoids
11:30 - 11:50	Andrea Montoli	The push forward construction and the Baer sum of special Schreier extensions of monoids
11:50 - 12:35	José Carlos Costa	Reducibility of pseudovarieties of the form $V^*D$
12:35 - 14:15	Lunch	
14:15 - 15:00	John Rhodes	Boolean representations of simplicial complexes: beyond matroids
15:00 - 15:20	Stuart Margolis	On the Topology of Boolean Representable Simplicial Complexes
15:20 - 15:40	Muhammed P. A. Azeef	Cross-connections of linear transformation semigroup
15:40 - 16:10	Break	
16:10 - 16:55	Markus Lohrey	Circuit Evaluation for Finite Semirings
16:55 - 17:40	Emanuele Rodaro	Equalizers and kernels in categories of monoids
