

## ERASMUS+ TRAINEESHIP / PLACEMENT OFFER

**Project title:** Odisseia Pelo Clima (climate odyssey)

**Project description:**

The Climate Odyssey (Odisseia pelo Clima) aims to engage communities in art-science-practice collaborations for place-based social change and climate action. It seeks to contribute to new approaches to climate change using the potential of artful and participatory elements to increase awareness and agency for the topic of climate change.

Climate Odyssey is a transdisciplinary approach involving artistic practices, social and natural sciences as well as local knowledges. The project aims to co-create with the local communities a thematic trajectory ('odyssey'), which elicits local stories of change and transformation and make visible the various aspects (social, cultural, environmental) of climate change.

**Department:** Animal Biology

**R&D Unit:** ce3c - centre for Ecology, evolution and environment

**Field of study:** geography, social sciences, natural sciences, art

**Supervisor:** Julia Bentz

**Personal webpage:** www.artforadaptation.com

**Number of weeks offered:** 16

**Within the months:** from March to June

**Number of working hours per week:** 16

**Publication date:** 6 / 12 / 2019

**Closing date:** 5 / 01 / 2020
