

# ACCESS Surgery®

Where Top Surgeons Begin

Introducing a new dimension to online surgical  
education and clinical practice

The most comprehensive online resource  
for all surgical information needs . . .  
at the library, in the hospital,  
or in the classroom.

**AccessSurgery®** from **McGraw-Hill Medical** introduces a whole new dimension to surgical education and clinical practice — all in one place. Updated regularly, this comprehensive online surgery resource provides **medical students** with the essentials needed to excel in their surgery clerkship; assists **residents** in gaining access to videos, self-assessment, and leading surgical textbooks

that establish an important foundation for learning; enables **clinical instructors** to create, track and report their students' progress through a Custom Curriculum tool; and allows **practicing surgeons** to brush up on their medical knowledge when studying for their Maintenance of Certification Exam.

Connect instantly to the fully searchable, complete content of  
20+ leading surgery textbooks, such as:

- > Schwartz's Principles of Surgery
- > Adult Chest Surgery
- > Cardiac Surgery in the Adult
- > CURRENT Diagnosis & Treatment: Surgery
- > Current Procedures: Surgery
- > Kuerer's Breast Surgical Oncology
- > Maingot's Abdominal Operations
- > Skandalakis' Surgical Anatomy
- > Trauma
- > Zollinger's Atlas of Surgical Operations

For a complete list of textbooks, visit the Readings tab on [accesssurgery.com](http://accesssurgery.com)

Tailored to your surgery program

**Custom Curriculum** is a powerful tool that enables **instructors** to customize and manage resident and student training from one convenient site:

- Build curriculum-specific topics, using assessment and test elements to track individual resident or student progress
- Match their program's unique education structure
- Provide targeted and trackable remediation

Residents and medical students can study procedures and test themselves, as well as track their performance, using faculty-selected resources.

Powerful interactive features  
deliver indispensable medical and  
educational support.

**Instructional Video Library**—Learn how to perform basic and advanced surgical procedures, step by step — as demonstrated by the world’s preeminent surgeons through instructional surgical videos and animations.

**Full-Color Images**—View an extensive collection of thousands of high quality full-color images to assist in visual diagnosis and step-by-step procedures.

**Interactive Board Review**—Ace the boards with thousands of ABSITE-style review Q&A, designed to help residents and clerks prepare for exams.

**Clerkship Corner**—Get all the specific resources students need for a successful rotation in surgery, including text references, case files, and videos on essential concepts and procedures.

**Differential Diagnosis Tool**—Select a symptom or disease to get instant differential diagnosis information.

**Simbionix Curriculum**—Included FREE with a subscription to AccessSurgery, the Simbionix curriculum is designed to be used in conjunction with the Simbionix MentorLearn System.

**Exploring Essential Surgery**—Introduce basic surgical concepts and techniques to the medical student through learning modules grouped by region for ease of study. Each module includes videos, images, and definitions, giving context to the topic.

## The AccessSurgery Advisory Board

Our preeminent Advisory Board includes three of the field’s top academic experts:

**Editor-in-Chief: Gerard M. Doherty, MD**  
*Boston University*

**F. Charles Brunicaudi, MD**  
*David Geffen School of Medicine  
at UCLA*

**Mary Ann Hopkins, MD**  
*New York University*
