SEMINAR

20 February 2020, 12h00 – 13h00

IDL's meeting room (building C1, 1st floor, near the library)

"21stC Industrial Environmental Management: setting the rulebook to transform Industrial Revolution mayhem to National Park Cities and Sustainable Land Management"

Speaker: Dr IOANNIS E. ALEXIOU

It is a lecture on sustainability of water and wastewater management, according to the experience of the senior consultant Ioannis Alexiou. He is President of the IWA (International Water Association) Pre-treatment Specialist Group for Industrial Waste and Wastewater since 2010 and President of the Metropolitan Branch of the Chartered Water and Environmental Management Institution (CIWEM) since 2014. He is a Sanitary Engineer and has a PhD in Digestion Analysis of industrial effluents from the University of Newcastle (United Kingdom).

Since September 2019 is consultant of the Saudi Government, acting as a UN expert advisor on the industrial strategy transformation.
