Biodiversity. Units, Levels, Scales

International Conference, October 6-7, 2016
Museu Nacional de História Natural e da Ciência, Lisbon

OCTOBER 6

9.30-11.30

Thomas A.C. Reydon
Are species good units of biodiversity? A few skeptical considerations

Elena Casetta & Jorge Marques da Silva
The role of communities in biodiversity conservation. The case of multispecies biofilms

Carlo Polidori
From individuals to species: all-scale specialization dominates resource use in wasps

12.00-13.20

Anne Chenuil
A multidisciplinary research to understand and to correct the impacts of species concepts and ignored cryptic species on biodiversity assessments

Lino Costa
Modification of habitats and introduction of exotic species in marine and estuarine environments: always a threat or sometimes an opportunity to increase biodiversity and to enhance biodiversity conservation?

15.00-17.00

Anouk Barberousse
The representations of biodiversity

Marie Roué
News from the battlefield: bridging epistemologies and ontologies in the field of biodiversity
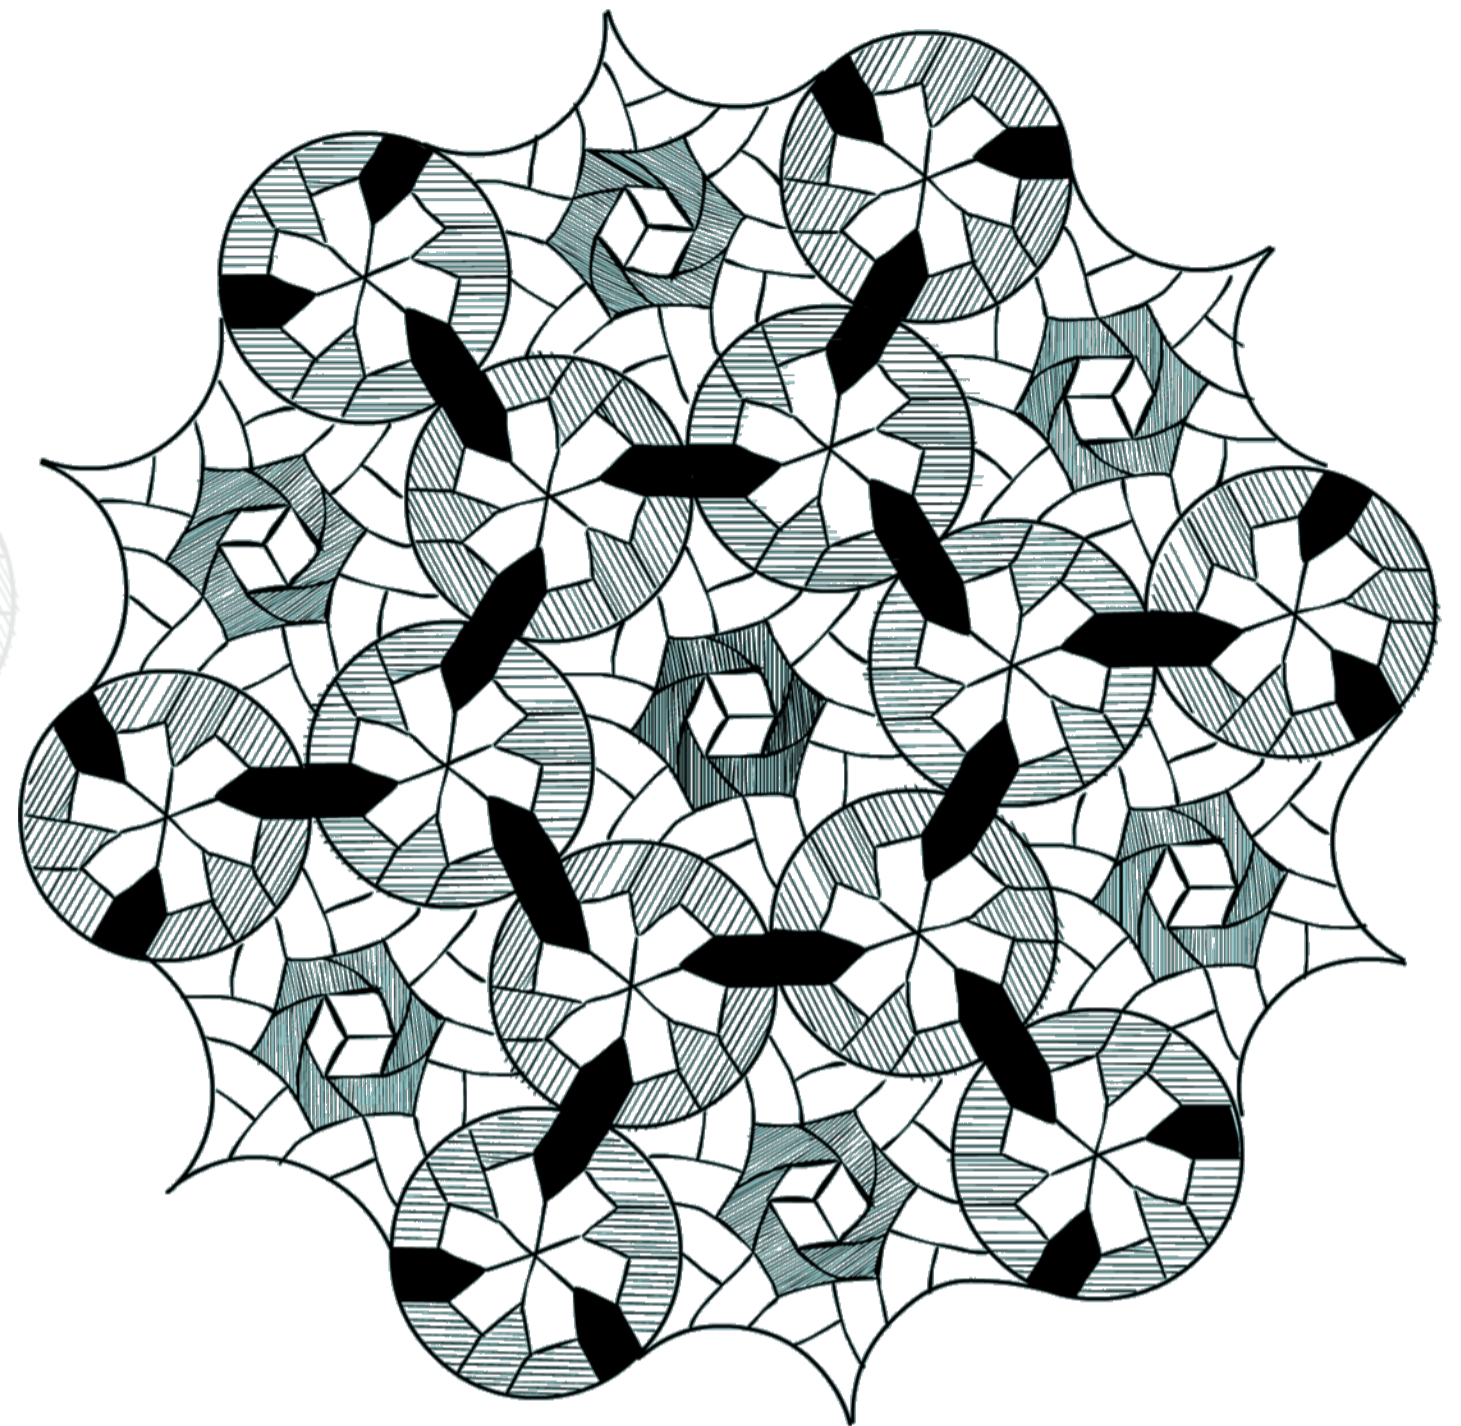

Matthias Kaiser
Value-ladeness of biodiversity – a post-normal conceptual analysis

18.00-19.00
Conferência Pública
Luís Vicente, Universidade de Lisboa
"O VALOR DA BIODIVERSIDADE"

OCTOBER 7

9.30-11.30

Cristina Branquinho
Measuring biodiversity from traits to landscapes

Davide Vecchi & Rob Mills
Can plasticity lead to the emergence of novel units of biodiversity?

Philippe Huneman
Laws, null hypotheses and ecology: situating the neutral theory in its philosophical context

12.00-13.20

Andrea Borghini
Ordinary biodiversity. The case of food

Maria Judite Alves
Natural history collections as models of the diversity of the natural world

15.00-16.00
Visita guiada ao Jardim Botânico

Participação gratuita. Inscrição obrigatória [sdmarco@fc.ul.pt] até 29 de Setembro
