

Laboratório de Instrumentação e
Física Experimental de Partículas

Seminário LIP*

Thursday, 18 January 2018

11:30 to 12:30

Lightweight Computer Virtualization

By Jorge Gomes (LIP)

Computer virtualization has been widely adopted in industry and science. Operating system level virtualization enables the creation of application specific computing environments (containers) that resemble virtual machines. Containers are efficient, flexible and can be used to encapsulate scientific applications.

* Place: Seminar Room (311)

LIP (Laboratório de Instrumentação e Física Experimental de Partículas)

Instituto Interdisciplinar de Investigação da Universidade de Lisboa

Av. Gama Pinto, 2, piso 3

Coffe and cakes at 11:00 in room 312
