

# $E=MC^3$ 2016

A *Spring to Summer* event of three mini-courses on  
**Dynamics and Differential Equations**

- KAM theory and Celestial mechanics      March 29-30  
by Alessandra Celletti  
*Universitá di Roma Tor Vergata*
- Topological degree and periodic solutions of ODEs      July 11-15  
by Fabio Zanolin  
*Universitá di Udine*
- Geometrical ideas in mechanics from Archimedes to Hamilton, Einstein, Poincaré and beyond      September 5-9  
by Mark Levi  
*Penn State University*

---

The courses will be held at Departamento de Matemática da Faculdade de Ciências da Universidade de Lisboa. Detailed information on each course will be available at the web page <http://mcdde2016.fc.ul.pt> closer to its date. For any question, please contact:
