Euromaster Summer Schools
An important activity of the Measurement Science in Chemistry (MSC), is the summer school – intensive course of the advanced topics of measurement science in chemistry, such as:

- Traceability in measurement in chemistry;
- Validation of measurement procedures in chemistry;
- Evaluation of measurement uncertainty;
- Statistics and statistical basis of calibration;
- ISO 17025 standard quality system and laboratory assessment;
- Sampling and sample preparation.

The teaching methods range from lectures to case studies, examples and role playing. Students get follow-up assignments and their learning is evaluated. After successfully completing all the assignments, 30 ECTS points can be assigned.

Summer schools have been organised in 2008 (Celje, Slovenia), 2009 (Blagoevgrad, Bulgaria), 2010 (Lepanina, Estonia) and 2011 in Poznan (Poland).

The subsequent summer school will take place on 15-28 July 2012, in Fátima (Portugal).

Who can participate?
The summer schools are attended by Master students of the MSC consortium and a limited number of places are made available to participants from other than the consortium universities. The minimum requirement for the qualification of a person enrolling to the program, including the summer school, is to have a bachelor degree in chemistry.

Practicalities
The summer school 2012 will take place in Fátima (Portugal). The fee for the participants that are coming from other than the consortium universities is 1900€. It covers all the learning activities, including the follow up assignments and learning evaluation, as well as full board accommodation. Details of the event will become available at the consortium website: http://www.msc-euromaster.eu/

How to register
By sending your letter of motivation and CV to Prof. Filomena Camões (e-mail: mfcamoes@fc.ul.pt / phone: +351 7500008), the chair of the Summer School Euromaster MSC 2012 Organising Committee.

If you are interested, what to do? Contact mfcamoes@fc.ul.pt by sending your letter of motivation and your CV.
Measurement Science in Chemistry: Consortium Members

- University of Tartu (Estonia)
- University of Warsaw (Coordinator, Poland)
- Adam Mickiewicz University (Poland)
- Maria Curie-Skłodowska University (Poland)
- University of Lyon (France)
- University of Lisbon (Portugal)
- University of Oulu (Finland)
- South-West University “Neofit Rilski” (Bulgaria)
- University of Maribor (Slovenia)

to measure is a pleasure... Join us in the MSC Summer School!
