

Workshop

12 July 2023

Faculdade de Ciências da Universidade de Lisboa,
Building C2, room 2.2.24

Pacto da Bioeconomia Azul: WP5 | Vertical Algas

14h00 High-added value molecules from Spirulina: from nutraceuticals to agricultural inputs

Imane Wahby

Mohammed V University, Faculty of Science; Department
of Biology; Laboratory of Botany and valorization of vegetal
and fungal resources; Rabat, Morocco

14h30 Marine biotechnology resources and strategies for improving human, animal and marine ecosystem health

João Varela

CCMAR - MarBiotech, FCT - University of Algarve

15h00 Development of new bioactive materials based on microbial exopolysaccharides

Patrícia Reis

UCIBIO - Applied Molecular Biosciences Unit / Associate Laboratory
i4HB - Institute for Health and Bioeconomy, NOVA FCT

15h30 Microalgae biorefineries

Alberto Reis

Bioenergy and Biorefineries Unit,
National Laboratory of Energy and Geology, Lisbon

16h00 How can microalgae promote circular economy?

Alice Ferreira

Bioenergy and Biorefineries Unit,
National Laboratory of Energy and Geology, Lisbon

16h30 Improving the sustainability of algae production in commercial-scale facilities

Hugo Pereira

GreenCoLAB, University of Algarve
